Special Session Policy

➢ We invite special session chairs who have already published several papers at top journals.

Special Session Requirement:

1. All special session papers' titles and author names for SOI conference should be announced until the previous year, end of September by special session chairs including his own and colleagues'.

2. Expanded abstracts of papers (with 1000 words or 10 pages PPT) should be submitted until the previous year 1st week's Monday of December.

   *(This date might in November, for example, for SOI 2023, the expanded abstracts submission deadline is until November 28(Mon.), 2022).

3. All papers (each special session has 5 papers) should be presented at SOI previous year 2nd International seminar on the previous year 1st week's Friday of December (online presentation is possible). All special session chairs (authors) should present each paper in 5 minutes. And, we require special session chairs and special issue paper authors to prepare top quality papers to pass the peer review process of SSCI special issues and JOI special issue process after SOI conference.

Special Session Advantage:

We will recommend top papers(papers for SSCI special issue shooting and papers for JOI special issue shooting).

*Recommendation means the non-direct rejection. From our system, the recommended papers from each special session would pass the review process more effectively because they have enough time(nearly 1 year) to prepare good papers, and they have several chances to develop their papers based on comments from world top scholars.

➢ All special session chairs and authors should upload full papers at SOI Conference platform until 10th June of that conference year.

➢ All special session chairs and authors should present papers at the conference in oral way or poster presentation(We suggest that three papers for oral presentation and two papers for poster presentation). Best poster presentation papers would be evaluated by all joiners and awarded with prize money.
